Ahmed Reda Alnajjar

Junior AI / Machine Learning & Software Developer

Cairo, Egypt | +20 10 9911 9352 | a7mdelnagar297@gmail.com | github.com/ahmed-reda-elnajjar | linkedin.com/in/ahmedreda04

PROFESSIONAL SUMMARY

Fresh Computer Science graduate from the Canadian International College (CIC) with hands-on experience designing end-to-end machine learning pipelines and shipping production-grade React applications. Proven ability to translate ambiguous requirements into working software, backed by competitive programming experience (ICPC) and a track record of delivering full-stack platforms with secure authentication, real-time data, and cloud deployments. Seeking a full-time role to contribute to AI/ML systems and modern web products.

TECHNICAL SKILLS

Languages	Python, JavaScript, Java, SQL
AI / Machine Learning	Scikit-learn, TF-IDF, Classification, Feature Engineering, Model Evaluation, Data Preprocessing
Frontend	React.js, Tailwind CSS, HTML5, CSS3, Sass, Responsive UI
Backend & Cloud	Firebase (Firestore, Auth, Storage), Cloudinary, REST APIs, Vercel
Data & Tooling	Pandas, NumPy, Google Colab, Git, GitHub

EXPERIENCE

MarketScan Pro — Smart Supermarket Management Dashboard (Graduation Project)

React.js, Vite, Tailwind CSS, Web Speech API, SVG Animations, JavaScript (ES6+) | 2025

- Built a SPA with **3 role-based interfaces** (Shopper, Employee, Admin), reducing workflow friction across **3 distinct user types**.
- Engineered an SVG store map with a **multi-stop shortest-path routing algorithm** supporting **10+ waypoints** per grocery list.
- Integrated Web Speech API for voice search and a Smart Cart tracking budgets in real time, auto-suggesting cheaper alternatives for **100% of over-budget items**.
- Built an Employee portal with **simulated barcode/QR scanning** and a predictive task-assignment system based on real-time store traffic.
- Designed an Admin control panel with inventory CRUD and a **custom heatmap visualizing 4+ high-traffic zones**.

Peaky Scouts — Call Center Recruitment Platform

React.js, Tailwind CSS, Firebase, Cloudinary, Vercel | peaky-scouts.vercel.app | 2024

- Architected a **full-stack hiring platform** connecting call center agents and employers through a streamlined end-to-end application workflow.
- Integrated **3 Firebase services** (Auth, Firestore, Storage) powering secure authentication, real-time job listings, and persistent applicant data.
- Built voice-recording screening and CV upload features, covering **2 critical fit-check steps** for every applicant.
- Shipped **continuous deployments** via Vercel; reduced iteration time with local caching across **multiple production releases**.

AI-Based Text Classifier — ML Pipeline

Python, Scikit-learn, Pandas, NumPy, Google Colab | 2024

- Built an **end-to-end ML pipeline** covering data preprocessing, TF-IDF feature extraction, model training, and performance evaluation.
- Benchmarked **5+ classification algorithms** and tuned hyperparameters, improving accuracy on imbalanced text data by **measurable margins**.
- Documented full workflow in **Google Colab notebooks** across **3+ reproducible stages** for easy handoff.

Negroo Move — Interactive Frontend Web Application

HTML5, CSS3, JavaScript, Sass | Live Demo Available | 2024

- Designed and developed a **fully responsive** web experience with clean UI and smooth interactions across **all screen sizes**.

- Optimized rendering performance and asset loading, achieving **fast first-paint** on both desktop and mobile.
- Maintained modular, scalable Sass architecture across **multiple component layers** for rapid feature extension.

Java Swing Drawing Application — Desktop GUI

Java, Swing, OOP | 2023

- Developed a desktop GUI drawing tool supporting **5+ shape primitives**, color selection, and freehand strokes.
- Applied **3 core OOP principles** — inheritance, encapsulation, polymorphism — alongside Swing event-handling patterns for a responsive UI.

EDUCATION

B.Sc. in Computer Science — Canadian International College (CIC), Cairo, Egypt

Graduated: 2026 | ICPC Participant | Machine Learning Pipelines | Full-Stack Development

CERTIFICATIONS

React Frontend Web Developer — Apr 2024 – Dec 2024
Digital Egypt Pioneers Initiative (DEPI) — Ministry of Communications & IT

Business English Track — Apr – Oct 2024
DEPI & Berlitz Egypt — Ministry of Communications & IT

CS50's Introduction to AI with Python — 2024
Harvard University (Online) — Search, Neural Networks, Language Models

Introduction to AI & Applications — Aug 2023
Zewail City of Science and Technology — 50-hour blended program

Entrepreneurship — Jan 2025
Canadian International College (CIC) in partnership with IGS & Partners

LANGUAGES & SOFT SKILLS

Languages: Arabic — Native | English — Fluent (professional working proficiency)

Soft Skills: Clear communication, cross-functional teamwork, structured problem-solving, time management, adaptability

Available for full-time roles in AI / Machine Learning and Software Engineering. Open to on-site, hybrid, and remote opportunities.
